Chongqing Xiucheng Investment Group Co., Ltd.

Surveillance credit rating report

CCXAP affirms Chongqing Xiucheng Investment Group Co., Ltd.'s long-term credit rating at BBB_g-, with stable outlook.

Summary

The BBB_g- long-term credit rating of Chongqing Xiucheng Investment Group Co., Ltd. ("XCIG" or the "Company") reflects the Xiushan County Government's (1) relatively strong capacity to provide support; and (2) extremely high willingness to provide support, based on our assessment of the Company's characteristics.

Our assessment of the Xiushan County Government's capacity to provide support reflects its fast economic growth, but is constrained by its relatively weak fiscal strength and self-sufficiency capability.

The rating also reflects the local government's willingness to provide support, which is based on the Company's (1) full and direct ownership by the Xiushan County Government; (2) status as one of the major development and construction entities in Xiushan County; and (3) solid track record of receiving government payments.

However, the rating is constrained by the Company's (1) medium exposure to commercial activities; (2) increasing debt burden with certain short-term debt repayment pressure; (3) weak asset liquidity; and (4) medium exposure to contingent risks.

The stable outlook on XCIG's rating reflects our expectation that the local government's capacity to support the Company will remain stable, and the Company will maintain its important role as one of the major infrastructure construction entities in Xiushan County for the next 12 to 18 months.

Rating Drivers

- One of the major development and construction entities in Xiushan County
- Medium exposure to commercial activities
- Solid track record of receiving government payments
- Increasing debt burden with certain short-term debt repayment pressure
- Weak asset liquidity
- Fair access to capital with low exposure to non-standard financing
- Medium exposure to contingent risks

Rating Sensitivities

What could upgrade the rating?

The rating could be upgraded if (1) the local government's capacity to provide support strengthens; and (2) changes in Company's characteristics enhance local government's willingness to provide support, such as reduced exposure to external guarantees or reduced exposure to commercial activities.

What could downgrade the rating?

The rating could be downgraded if (1) the local government's capacity to provide support weakens; or (2) changes in Company characteristics decrease the local government's willingness to provide support, such as reduced regional significance and reduced government payments.

Corporate Profile

Established in 2018, XCIG, formerly known as Xiushan County Xingtai Industrial Co., Ltd., became one of the most important development and construction entities in Xiushan County after a series of equity transfers in 2021. The Company is mainly engaged in infrastructure construction and resettlement housing construction in Xiushan County as well as commercial businesses including engineering construction, real estate development, transportation, security and leasing. As of 30 June 2025, the State-owned Assets Supervision and Administration Office of Xiushan Tujia and Miao Autonomous County ("Xiushan SASAO") was the ultimate controller of the Company, directly holding 100% stakes of the Company.

Rating Considerations

Government's Capacity to Provide Support

We believe the Xiushan County Government has a relatively strong capacity to provide support to the Company, given its fast economic growth, but constrained by its relatively weak fiscal strength and self-sufficiency capability.

Chongqing City is one of the four municipalities in China and the only municipality in Western China. It has formed a pillar industry pattern represented by modern heavy machinery, electronics, chemical and pharmaceutical, as well as the energy industry. Chongqing City's economy has demonstrated a growth trend over the past years. In 2024, Chongqing City's gross regional product ("GRP") increased by 5.7% year-on-year ("YoY") to RMB3.2 trillion, ranking 4th among municipalities and prefecture-level cities in China. In the first three quarters of 2025, Chongqing City achieved GRP of RMB2.4 trillion, up by 5.3% YoY. At the same time, the general budgetary revenue of Chongqing increased from RMB244.1 billion in 2023 to RMB259.5 billion in 2024, up 6.3% YoY. However, Chongqing City has a relatively weak self-sufficiency, with fiscal balance ratios (general budgetary revenue/general budgetary expenditure) of around 46.2% in 2024. The debt profile of Chongqing Municipal Government is relatively weak. The outstanding direct government debt balance of Chongqing increased to RMB1.4 trillion in 2024, accounting for 44.8% of its GRP for that year.

Exhibit 3. Key Economic and Fiscal Indicators of Chongqing City

	2022FY	2023FY	2024FY
GRP (RMB billion)	2,912.9	3,014.6	3,219.3
GRP Growth (%)	2.6	6.1	5.7
General Budgetary Revenue (RMB billion)	210.3	244.1	259.5
General Budgetary Expenditure (RMB billion)	489.3	530.4	562.1
Local Government Debt (RMB billion)	1,007.1	1,225.8	1,442.5

Xiushan County is located in the southeast part of Chongqing City. According to the ranking of Top 100 Counties in terms of Economic Strength in Western China released by CCID Consulting County Economic Research Center, Xiushan County ranks 81st in 2024, listed among the top 100 counties in the western region for 6

consecutive years. On the back of its geographical advantages and natural resources, it has formed 5 pillar industries of biomedicine, food processing, new materials, electronic information and automotive parts. Benefiting from rapid industrial growth, Xiushan County achieved a GRP of RMB44.7 billion with a YoY increase of 5.1% in 2024, ranked 28th among 38 districts or counties in Chongqing City. In the first half of 2025, its GRP reached RMB21.6 billion, up by 3.2%. Xiushan County Government's fiscal strength has also improved in recent years. Its general budgetary revenue increased from RMB2.0 billion in 2023 to RMB2.6 billion in 2024. However, Xiushan County Government relies on the revenue from government funds and grants from the higher-tier government, reaching RMB2.3 billion and RMB4.3 billion in 2024, respectively, and causing certain uncertainties in its fiscal stability as land transfer income is susceptible to the volatility of land market activities and fluctuation of real estate market. It has a relatively weak fiscal self-sufficiency profile as its fiscal balance ratio was 33.7% in 2024. Xiushan County Government's outstanding debt has shown an increasing trend, with outstanding debts increasing from RMB14.2 billion in 2023 to RMB18.9 billion in 2024, accounting for 42.4% of its GRP.

Exhibit 4. Key Economic and Fiscal Indicators of Xiushan County

	2022FY	2023FY	2024FY
GRP (RMB billion)	35.8	37.0	44.7
GRP Growth (%)	3.5	6.4	5.1
General Budgetary Revenue (RMB billion)	1.7	2.0	2.6
General Budgetary Expenditure (RMB billion)	6.2	7.0	7.8
Local Government Debt (RMB billion)	11.1	14.2	18.9

Government's Willingness to Provide Support

One of the major development and construction entities in Xiushan County

There are three main state-owned enterprises ("SOEs") in Xiushan County, which are XCIG, Chongqing Xiuye Investment Group Co., Ltd. ("XYIG") and Chongqing Xiujing Investment Group Co., Ltd. ("XJIG"), each with clear positioning in the development of the region. XCIG undertakes local infrastructure construction and resettlement housing construction in Xiushan County outside Xiushan High-tech Industrial Development Zone ("Xiushan HTDZ"), while XYIG is responsible for infrastructure construction and land development and operation of Xiushan HTDZ and Xiushan Logistics Park. XJIG is mainly responsible for the construction and operation of scenic spots in Xiushan County. As XCIG's infrastructure construction projects are crucial to local social and economic development, we believe that the Company's replacement cost is relatively high.

The Company undertakes infrastructure construction projects including municipal roads, park supporting facilities, and landscape engineering in the urban area of Xiushan County, mainly through an agency construction model. As of 30 June 2025, the Company had 3 infrastructure construction projects under construction or planning with a total investment of RMB3.7 billion and an uninvested amount of RMB127.1 million. The sustainability of this business is uncertain as there is no infrastructure construction project under planning.

XCIG also develops affordable housing projects in Xiushan County through a government purchase model. The local government would repurchase the affordable housing and pay the project construction management fee to the Company after acceptance of the project. As of 30 June 2025, the Company completed 8 key affordable housing projects with a total investment of RMB3.6 billion and received repayment of RMB3.1 billion. At the same time, there were 2 affordable housing projects under construction, with a total estimated investment of around RMB1.2 billion and an uninvested amount of RMB610.0 million, indicating certain capital expenditure

pressure.

Medium exposure to commercial activities

XCIG also engages in various commercial activities, such as engineering construction, real estate development, transportation, security and leasing. We consider XCIG's commercial business exposure to be medium, as its marked-driven business accounted for around 30% of its total assets. These activities have been a good supplement to the Company's revenue but could exert certain funding and business risks. The Company plans to expand its operations by engaging in new businesses, which may diversify its revenue sources but entail certain operational risks.

The Company conducts engineering construction business in Xiushan County. Relying on its state-owned background, XCIG has become the main municipal engineering construction entity in Xiushan County, with strong regional competitive advantages. Benefiting from regional competitive status, the engineering construction business serves as the main income driver of the Company, accounting for 64.4% of the Company's total revenue and 66.1% of its gross profit in 2024. From 2024 to 2025H1, there were 44 newly signed contracts. As of 30 June 2025, the Company had 52 contracts in hand, with a total contract value of RMB2.9 billion, indicating good business stability. However, the engineering construction business has a relatively long construction period and slow repayment collection, which brings certain pressure on repayments of its counterparties (most of which are SOEs) during the downturn in the construction industry.

XCIG undertakes the development of commercial housing projects in Xiushan County, including residential commercial housing and shops. As of 30 June 2025, the Company had completed 5 commercial real estate housing projects, most of which were sold out, with a total investment of RMB3.1 billion and contract sales of RMB2.4 billion. Meanwhile, the Company had no commercial housing real estate projects under construction or planning. We believe the Company will face certain destocking pressure as it is highly vulnerable amid the downturn of China's property market.

Moreover, the Company is also responsible for operating other businesses such as security, leasing, and guarantee. The security business mainly provides labor dispatch and security services to public institutions, state-owned enterprises, financial institutions and private enterprises in the county. For the leasing business, the occupancy rate was around 88.9% as of 30 June 2025. The guarantee business mainly carries out financing guarantee business such as loan guarantees, bill acceptance guarantees and letter of credit guarantees. These businesses contribute less to the Company's overall revenue as total accounted for around 15.3% of the Company's total revenue in 2024.

The Company is no longer engaged in transportation business as the subsidiary was transferred out under Xiushan County's SOEs reforming plan in 2024. The Company plans to expand its operations by adding three new business lines: commercial concrete production and sales, wellness and elderly care services, and funeral and interment services, strengthening its profitability and revenue diversification.

Solid track record of receiving government payments

In recognition of its importance as a key state-owned assets operator in Xiushan County, XCIG has received recurring government support, including asset and capital injections from the Xiushan County Government. In 2024, the local government injected assets into the Company, including shareholdings in several local SOEs with a total value of RMB91.1 million, as well as commercial properties valued at RMB2.0 billion, diversifying the business scope of the Company. In addition, the Company received a capital injection of RMB5.0 million

and subsidy of RMB4.6 million in 2024 from the Xiushan County Government. Given XCIG's important strategic role in the region, we expect the Company will continue to receive support from the government in the future.

Increasing debt burden and certain short-term debt repayment pressure

Due to the continuous investment in agency construction projects and property development projects, XCIG's total debt has been growing over the past years. As of 30 June 2025, the Company's total debt increased from RMB6.0 billion at mid-2024 to RMB7.1 billion, with a high total capitalization ratio of 50.0%. The Company is exposed to certain short-term debt repayment pressure as its short-term debt accounted for around 27.9% of total debt as of 30 June 2025 and its unrestricted cash to short-term debt was 0.2x at the same time, indicating that its cash reserve could not fully cover the short-term debt. Given the Company's future capital expenditure pressure for its investment and construction projects, we expect the Company's debt level will continue to increase for the next 12-18 months.

Weak asset liquidity

XCIG's asset liquidity is weak. As of 30 June 2025, its account receivables, other receivables and inventories accounted for around 48.8% of its total assets, which may undermine its financial flexibility. Inventories are mainly investment costs for construction projects and land-using rights while receivables are mainly from the local government and other local SOEs, both of which are considered low liquidity. Meanwhile, the long-term equity investment accounted for 18.5% of total assets, which are shares of Xiushan Huaxin State-owned Assets Management Co., Ltd., injected by the local government in 2021.

Besides, XCIG's asset liquidity is constrained by its relatively high portion of restricted assets. As of 30 June 2025, the Company's pledged inventories with a total restricted amount of RMB3.2 billion, accounting for 18.9% of its total assets.

Fair access to capital with low exposure to non-standard financing

The Company mainly relies on bank loans for financing, with sufficient standby liquidity. As of 30 June 2025, it held total bank credit facilities of RMB10.7 billion with available credit facilities of RMB2.0 billion. In addition, the Company has a low exposure to non-standard financing, which accounted for below 5.0% of its total debt. We expect that the Company will continue to broaden its financing channels, such as increasing its credit facilities.

Medium exposure to contingent risks

The Company has certain exposure to external guarantees. As of 30 June 2025, the Company's external guarantees amounted to RMB2.4 billion, accounting for 33.5% of its net assets. Most of the external guarantees were provided to other local state-owned enterprises. We believe that the credit risk of the guarantees is moderately controllable, taking into account the government's support of local state-owned enterprises. However, if a credit event occurs in Xiushan County, it may lead to large-scale cross-default.

However, as of 30 June 2025, the Company's subsidiary engaged in financing guarantee business, with an amount of RMB408.0 million in guarantees and an amount of RMB42.0 million in payments receivables. Most of the guaranteed enterprises are private-owned enterprises. During the guarantee period, if the guaranteed party is unable to repay the loan and the value of its collateral is insufficient to repay the relevant debts, the Company will bear the risk of repaying the bank loan on its behalf.

ESG Considerations

The Company is subject to environmental laws and regulations governing air pollution, noise emissions, hazardous substances, water and waste discharge and other environmental matters issued by the national governmental authorities. XCIG assumes environmental risks for its infrastructure projects. Such risks could be mitigated by conducting environmental studies and detailed planning prior to the commencement of projects and close supervision during construction.

XCIG is also exposed to social risks as it implements public-policy initiatives by building public infrastructure in Xiushan County. Demographic changes, public awareness and social priorities shape government's development strategy, and it will affect the government's propensity to support the Company.

The Company's governance considerations are also material as it is subject to oversight and reporting requirements to the local government, reflecting its public-policy role and status as a government-owned entity. XCIG believes that it is in compliance in all material respects with the applicable governmental regulations, rules and executive orders in each jurisdiction in which it operates. The Company maintains regular communication with local governments and regulatory authorities through its management team or representatives, ensuring compliance with the requirements and conditions for obtaining and maintaining the licenses, concessions, permits, or certificates.
